5 REASONS WHY YOU AND ALL NHS STAFF DESERVE A PROPER PAY RISE

- 1 You've earned it** – NHS workers have battled on the Covid-19 frontline, worked over a million hours of unpaid overtime and risked your lives to You deserve better than 3%.
- 2 We can afford it** – This government has spent billions of taxpayers' money on failing contracts, so we know it can afford to do better by our NHS workers.
- 3 A decade of pay cuts and pay freezes** – Pay for many NHS staff has fallen by 19 per cent in real terms since 2010. A 15% pay rise or £3,000 is affordable and will go some way to undoing the damage done.
- 4 You spend locally** – a proper NHS pay rise will help our communities recover. Giving NHS staff a substantial pay rise will boost spending in every community in every part of the UK, providing much needed revenue for our country's struggling shops and restaurants.
- 5 Too many healthcare workers are leaving** – forced out of the job you love because of low pay, stress, long shifts and the treatment you received during Covid. Overstretched and undervalued, you deserve so much better than this.
