

GLASGOW – UNITE FOR A WORKERS’ ECONOMY

■ Our economy isn't working for anyone but the wealthiest people and biggest corporations. The very workers who kept our nation running throughout the pandemic face a cost of living crisis, while the **1% reap the rewards of our labour.**

■ Politicians are failing workers and their families across Glasgow and beyond.

- Startling new data shows **13% of Glasgow residents – more than 82,000 people** – simply can't pay their household bills this year.
- **Over 24% – 152,000 people** – are experiencing moderate to severe levels of food poverty.
- The Glasgow seats polled account for 7 of the top 20 worst hit constituencies for food poverty across the UK.

- That's why Unite is launching a campaign to put working people over profit and politics. We're focusing our energy into building popular, working class power in order to fundamentally change the system that is rigged against us.
- Unite have begun to establish bases in Glasgow. We will help deliver practical change that people can touch and feel, following the failure of politicians to act.
 - We will push for higher wages, freedom from food & fuel poverty, investment in and protection for members of the NHS, and adequate pensions.
 - We will hold corporations accountable to the people who deliver them their bottom line.
 - We will continue to agitate, organise and campaign, we will protest and strike, standing with workers rather than party leaders.

We must take action, we must build popular, working-class power. The ground is there for us to build on, and we're just getting started.
