

We must do it ourselves

Our economy isn't working for anyone but the wealthiest people and biggest corporations. Workers like us who kept our nation running throughout the pandemic are struggling to get by, while the 1% reap the rewards of our labour.

It is time to face facts. There is no Westminster hero coming to save us. We must do it ourselves, before it's too late.

Unite for a Worker's Economy is campaigning in Hull and Grimsby to put working people over profit and politics.

We're focusing our energy into building popular, working class power to change the system that is rigged against us.
