

68 IS TOO LATE!

Don't raise the pension AGE

Millions of workers are at risk of having their retirement age increased by a year, from 67 to 68. This is likely to affect workers currently between the ages of 44 and 52.

Why must it always be workers, and not the wealthy, who pay for politicians' bad choices? We create the wealth in this society, and we deserve a share of that wealth in our old age.

Decades of bad choices by politicians have left us with an economy which does not work for workers.

Now, after the last Tory government blew a £30bn hole in the Treasury's budget, this government wants to raid our state pension to pay for its mistakes.
